Audit summary

No non-conformance(s) / observation(s) noted for items under review at this Audit. No actions required.

Note:

- *The Audit process is both random and selective and it is based on a limited assessment of a representative sample or samples of a Production Unit and on relevant quality assurance measures*
- *We welcome and encourage customer feedback about the audit process or any other certification issue*
- *Under the requirements of the AGA Rules Governing, it's the Certificate Holders' responsibility to:*
 - *ensure product is manufactured in strict conformity to the Certified Design*
 - *keep records of customer complaints and associated actions taken and make these records available upon request*
 - *Advise AGA of any matters that may affect compliance / certification*
 - *Advise the ACCC, relevant gas Safety Regulators and AGA of any public safety matters (including potential safety matters) / incidents / accidents*
